

Burnin' Germans Launched by Painted Hills Natural Beef

Fossil, Ore. – Adding to the already popular line of Hot dogs, Franks, and German Brand Sausages Painted Hills Natural Beef is pleased to announce the release of their newly developed All-Natural Burnin' German Brand Sausages. The Burnin' German's are made with the same natural beef that is found in your meat counter and cases. After months of formulation, and just in time for the cold winter nights, this new spicy sausage is now available to all retail partners.

Painted Hills Natural Beef will again be working with Hempler's Foods in Ferndale, Washington to produce this product. Recent advances in food technology are now allowing the company to pursue nitrite and nitrate free products while still retaining an appealing product color and great taste. This has proven to be a winning combination.

The Burnin' German Brand Sausages will be four (4) dogs per pound and will come eight (8) packages per case. Shelf life is set at sixty (60) days. For more information, contact Jen Nicholson, Projects Coordinator Jen@natural-beef.com or toll-free at 1.877.306.8247.
